Course Syllabus

School Year	2026-2027
Subject	Psychology
Grade Level	12
Teacher	Dr. Eranie V. Portillo, RGC
Email	aportillo@dishs.tp.edu.tw

COURSE DESCRIPTION:

This course provides a scientific and systematic study of behavior and mental processes in humans and other animals. Students will explore key subfields—biological, developmental, cognitive, social, and clinical psychology—through the lens of current research, emerging trends, and applied practice. Learning will be grounded in psychological theory, recent studies, and hands-on activities such as experiments, simulations, and field applications.

COURSE OBJECTIVES: By the end of the semester/school year, (SWBAT) Students will be able to:

- Understand the biological, cognitive, social, and cultural influences on behavior.
- Analyze current psychological research on topics such as mental health, emotional regulation, resilience, and human interaction in the digital age.
- Apply psychological principles to real-world issues including diversity, gender, health, and well-being.
- Use research methods—design, data collection, and analysis—to investigate psychological questions.
- Develop critical thinking, ethical reasoning, and scientific literacy for academic and everyday contexts.

EXPECTED LEARNER OUTCOMES:

To foster scientific curiosity, critical thinking, and the application of psychological theory, students will be able to:

- Demonstrate familiarity with major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.
- Understand and apply basic research methods, including design, data analysis, and interpretation.
- Use critical and creative thinking, skeptical inquiry, and scientific approaches to solve behavior-related problems.

- d) Apply psychological principles to personal, social, and organizational contexts.
- e) Weigh evidence, tolerate ambiguity, act ethically, and reflect psychology's core values.
- f) Demonstrate information competence and use technology effectively.
- g) Communicate clearly in multiple formats.
- h) Recognize and respect sociocultural and international diversity.

RECENT TOPIC HIGHLIGHTS

- a) **Neuroscience advances:** brain plasticity, neuroimaging, and brain–behavior links.
- b) **Mental health in the 21st century:** stress, burnout, and digital-era challenges.
- c) **Social psychology in online spaces:** cyberbullying, social media influence, digital relationships.
- d) **Positive psychology:** gratitude, resilience, and strengths-based approaches.

- d) Role play and dramatization to explore perspectives.
- e) Collaborative problem-solving for applied scenarios.
- f) Planning interventions for real-world psychological challenges.
- g) Technology integration: online lab experiments, digital research, and multimedia presentations.

ACADEMIC DISHONESTY:

Academic Dishonesty means employing a method or technique or engaging in conduct in an academic endeavor that contravenes the standards of ethical integrity expected at DIS.

Academic dishonesty includes but is not limited to the following:

- Purposely incorporating the ideas, words of sentences, paragraphs, or parts thereof without appropriate acknowledgment and representing the product as one's work;
- Representing another's intellectual work, such as photographs, paintings, drawings, sculpture, research, or the like, as one's own, including failure to attribute content to an AI.
- Employing a tutor, using Artificial Intelligence without acknowledgment, getting a parent to write a paper or do an assignment, and paying for an essay to be written by someone else and presented as the student's work.
- Committing any act that a reasonable person would conclude, when informed of the evidence, to be a dishonest means of obtaining or attempting to obtain credit for academic work.

Any act of academic dishonesty will result in an automatic zero on the entire assignment/learning task.
